

Definitions:

Branch: branch refers to the company branches that we have. We have Abu Dhabi branch, Dubai branch, west Yas branch, and Ras al Khaimah branch. Different branches might have different commission slabs.

Hiring Process:

What KYC documents do you currently collect from brokers? (Trade license, Emirates ID, RERA card, etc.)	All: emirates ID, passport, other documents needed for HR dubai: RERA card
---	---

Things needed for this process:

1. Offer letter
2. join the training
3. sign contract
4. Once one week of boarding is done, they can officially start

RERA Verification Process (Dubai)

In Dubai, a broker cannot legally operate as a real estate agent unless they hold a valid RERA Broker Card.

The process is as follows:

1. Broker Registration with Brokerage

The broker first joins a licensed real estate company registered with the Dubai Land Department.

During onboarding, the brokerage collects the following documents:

1. Photo
2. Visa copy

3. Emirates ID

4. Passport copy

2. Mandatory Training (Paid by Nationwide)

The broker must complete the **RERA certification training** through the Dubai Real Estate Institute (DREI). This is also sometimes paid by the broker from his salary, but only after a year of staying with Nationwide.

3. RERA Exam (Paid by Broker)

After completing the training, the broker must pass the RERA certification exam administered by DREI.

Once the exam is passed, the broker can apply for the RERA Broker Card.

4. Verification by Brokerage

Once the RERA card is issued, the brokerage verifies:

1. the validity of the RERA card
2. the broker name
3. the license number
4. the expiry date.

Only after verification can the broker operate in Dubai.

Abu Dhabi – ADM License Verification

In Abu Dhabi, you only need an ADM license when

dealing with official municipality processes such as registering property transactions.

Current Practice at Nationwide

If an agent does not yet have an ADM license, another licensed staff member from Nationwide may handle the municipality process on their behalf.

Process of Obtaining an ADM Broker License

1. Broker Registration with Brokerage

The broker joins a licensed Abu Dhabi brokerage.

2. Broker Licensing Application

The brokerage submits the broker's information through the Abu Dhabi Municipality (ADM) real estate licensing system.

3. License Verification

Once the ADM license is issued, the brokerage verifies:

1. license validity
2. broker details
3. license expiration.

Contract Information:

1. Employment Relationship

The agreement establishes the employment relationship between Nationwide Middle East Properties L.L.C. and the sales agent.

2. Contract Duration

The contract is valid for **two (2) years** from the date of joining.

3. Compensation Structure

Compensation is primarily **commission-based**.

Some positions may also include a **monthly allowance** depending on the role.

4. Working Hours

The standard working hours are:

Monday – Thursday: 9:00 AM – 6:00 PM

Friday: 9:00 AM – 4:00 PM

Saturday: 9:00 AM – 3:00 PM

5. Probation Period

The first **six (6) months** of employment are considered a probation period.

6. Performance Requirements (KPIs)

Agents are expected to meet certain performance indicators, including:

Achieving **monthly sales targets**

Maintaining **acceptable customer satisfaction ratings**

Successfully handling **at least one client case per month**

(Question: Are you able to track the performance of agents within the application you are building and integrate it with our performance measurement process?)

7. Exclusivity

The agent must **work exclusively for Nationwide** and cannot work for another brokerage during their employment.

8. Commission Policy

If the agent violates company policies or harms the company's interests, the agent **forfeits the right to claim any outstanding commissions** upon resignation or termination related to that violation.

9. Confidentiality

The agent must:

Keep **client and company information confidential**

Not disclose business or client information after employment ends

Acknowledge that any **intellectual property created during employment belongs to the company**

10. Non-Compete Agreement

The agent cannot work for a **competing company in Dubai, Abu Dhabi, or Ras Al Khaimah for up to two (2) years** after leaving the company unless written approval is granted.

11. Client and Employee Protection

The agent agrees not to:

Solicit the company's clients for one (1) year after leaving the company.

12. Training Commitment

If the company pays for training, the agent must **repay the training costs if they resign within one year of completing the training.**

13. Compliance with UAE Labor Law

The contract and employment relationship are governed by **UAE Labor Law.**

There is a tier system for brokers:

1. Junior (different slabs),
2. senior,
3. sales expert (salary) ,
4. team leader, sales manager

Developer Launch & Deal Processing Workflow

Project Launch Preparation

Projects are typically released in phases: **internal developer clients, VIP investors, master brokerages, and the public launch**. Units may already be reserved in earlier phases before reaching the public stage, so the inventory shared with brokers can change quickly.

For this reason, when a broker brings a client to the developer's sales center, the developer checks the **live inventory system** to confirm the unit is still available. If it is available, the reservation process proceeds (reservation form completion and down payment collection). This step ensures the unit can still be booked before finalizing the transaction.

- The **developer announces a new project**.
- A **launch date is scheduled**.
- The developer invites brokerage firms and their agents to attend the launch event.
- Brokers and agents confirm attendance through **appointment/registration links**.

Inventory data from developers:

List of developers that we work with:

API & Digital Systems:

- ✧ Al dar properties
- ✧ Emaar properties
- ✧ DAMAC Properties
- ✧ Sobha Realty
- ✧ Nakheel

manual:

- ✧ Reportage Properties
- ✧ Samana Developers
- ✧ Tiger Properties
- ✧ Azizi Developments

Inventory data from developers is currently received through multiple channels and there is no standardized format. It may be shared via Excel files, PDFs, developer broker portals, email, or WhatsApp (sometimes as files or screenshots).

When I say “go to the developer,” I mean physically visiting the developer’s sales center, although inventory can sometimes also be viewed through the developer’s broker portal.

Ideally, if integrations with developer systems are possible, the app could sync inventory in real time. Otherwise, the system may need to support manual uploads or imports depending on how the developer provides the data.

that only developers have full view access to everything. Brokers can know what is available by asking, email, or these sheets that are shared in

There is no manual integration

How do you know when inventory is recalled? How does this communication happen right now?

Currently, there is no standardized automated mechanism across developers for notifying brokerages when inventory is recalled. Communication is typically handled through manual channels and developer relationship managers.

Developer Appointment Booking Process

1. Agent Requests Appointment

When an agent has a client interested in a specific project or unit, the agent approaches **Vie (the secretary)** to request an appointment with the relevant developer.

The agent provides the following information:

1. Developer name
2. Project name
3. Unit number (if known)
4. Client details
5. Preferred date and time

2. Vie Books the Appointment with the Developer

Vie coordinates the appointment based on the process required by each developer. The method varies depending on the developer.

a. Broker Portal

Some developers require client registration and appointment booking through their broker portal.

Typical steps:

1. Vie logs into the developer portal
2. Registers the client
3. Selects the project
4. Books the appointment slot or meeting

b. Relationship Manager (WhatsApp / Email / Phone)

Some developers assign a relationship manager (RM) to brokerages.

In these cases, Vie contacts the RM directly through:

1. WhatsApp
2. Email
3. Phone

The message usually includes:

1. Broker name
2. Client details
3. Project name
4. Requested meeting time
5. The RM then confirms the appointment.

c. Sales Center Walk-In

Some developers allow agents to bring clients directly to the sales center without a formal booking.

In this case:

1. Vie informs the agent that the visit can proceed
2. The agent brings the client to the developer's sales center
3. The developer's sales team handles the meeting

3. Appointment Confirmation

Once the appointment is confirmed:

1. Vie informs the agent
2. The agent schedules the visit with the client
3. The agent and client go to the developer's sales center

4. At the Developer Sales Center

When the agent and client arrive:

1. The client is registered in the developer system
2. The developer checks real-time unit availability
3. If the unit is available:
4. the reservation form is completed
5. the down payment is submitted
6. The developer blocks the unit in their system

How is this information shared with the developer

If they have portals: attached through portals

if the don't: WhatsApp or email

If a developer has a portal, it might be reflected via the portal via a status change. I will try to see if I can get an example for each developer that has a portal

Pre deal fields:

- 1. Unit Code:** The developer's internal code used to uniquely identify the property.
- 2. Status:** Current availability status of the unit (e.g., Available).
- 3. Unit Type:** Type of property (e.g., apartment, villa, townhouse).
- 4. Total Rooms:** Number of bedrooms in the unit (e.g., 2-bedroom, 3-bedroom).
- 5. Selling Price:** Total selling price of the property.
- 6. Unit View:** The primary view from the unit (e.g., Mamsha, Partial ZNM, Park / Artisan District).
- 7. Total Area:** Total area of the property.

(I will work to get more detailed fields per developer)

there are two types of appointments:

1. Viewing Appointments

For property viewings or meetings at the developer's sales center, multiple appointments for the same unit are generally allowed, but not at the same time slot.

Each appointment is scheduled for a specific time to ensure that two clients do not view the unit simultaneously.

Example:

Agent A books a viewing at 10:00 AM

Agent B books a viewing at 11:00 AM

However, both agents cannot book the same unit at 10:00 AM.

2. Launch Event Appointments

For developer launch events, brokers typically book **a time slot to attend the event**, rather than an appointment tied to a specific unit.

In this case, **multiple brokers can book the same time slot**, since the event is designed to accommodate multiple attendees.

During the launch event, brokers can then select units from the available inventory.

Example:

Broker A books the 10:00 AM – 12:00 PM launch slot

Broker B also books the 10:00 AM – 12:00 PM launch slot

Both brokers attend the event during that time and can compete for available units.

Interested Customer Process

Step 1 – Agent collects client information

The agent gathers the required information from the client, including:

- Full name
- Nationality
- Date of birth
- Passport copy
- Emirates ID (if applicable)
- Mobile number
- Email address

The agent also discusses the client's requirements, including preferred project, unit type, budget, and payment method.

Step 2 – Agent identifies the property of interest

Based on the client's requirements, the agent identifies the relevant project and unit from the inventory shared by the developer.

Step 3 – Agent communicates client information to the developer (via Secretary Vie, review Phase Q1)

Step 4 – Agent prepares the client for reservation

The agent ensures the client has the required documents and payment method ready for the reservation process.

Typical requirements include:

1. passport copy
2. Emirates ID copy (check if there's more)

reservation payment (usually cheque or transfer)

Step 5 – Agent confirms unit availability with the developer

The developer sales team checks the live inventory system to confirm whether the selected unit is still available.

If the unit is unavailable, the agent assists the client in selecting another available unit.

Step 6 – Reservation process begins

If the unit is available:

the reservation form is completed

the client submits the down payment

the developer blocks the unit in their system.

Step 7 – Reservation confirmation

Once payment is submitted and verified, the developer confirms the reservation and proceeds with the next step of the transaction process.

Launch Event & Deal Initiation

- Agents attend the launch event and meet potential buyers.

- If a deal is secured during the event, the agent proceeds with documentation and payment processing.

Payment Methods

For **Primary Sales**:

- Cheque
- Bank transfer

For **Secondary Sales**:

- Cash
- Cheque
- Bank transfer

Documentation & Confirmation

Once a deal is agreed:

- A **Reservation Form** (provided by the developer) is signed by both parties.
- The **SPA (Sales Purchase Agreement)** is issued from the developer's side.
- The SPA is signed and collected by the developer.
- A copy/photo of the signed SPA is taken as confirmation.
- Bank information (if applicable) is recorded.

Internal Booking Process

- The agent submits all deal details to the administration team.
- Admin books the deal in the internal system.
- The signed SPA is officially assigned in the system.
- The agent provides complete property details and client information to admin.

In some cases:

- The developer sends a **Brokerage Confirmation** (not all developers provide this).

Post-Deal Follow-Up

- A follow-up email is sent regarding the deal status.
- The developer sends a **Tax Invoice Request**.
- The brokerage issues and sends the **tax invoice** to the developer.

Deal Booking & Numbering Process

- Agents email the administration team with all relevant deal details.
 - Buyer ID
 - Buyer Passport
 - Unit details
 - Buyer information (email, mobile number)
- Upon receipt, the admin team enters the deal into the CRM (Zoho).
 - SN
 - Sale Type
 - Date
 - Ref No.
 - Property Ref. No
 - Launch / Inventory
 - Account Name
 - KYC
 - Buyer
 - Landlord
 - Unit No.
 - Project Name
 - Selling Amount
 - %
 - Commission
 - External Commission
 - Net Commission to Company
 - Agent
 - Employee No.
 - Team Leader
 - Sales Manager
 - Branch
 - Registrar
 - Coordinator
 - SOL
 - Agent SOL Referral Comment

- Notes
- Buyer Nationality
- Source of Fund
- No. of BR
- Mobile Number
- Email Address
- Date of Birth (Buyer)
- Buyer's Gender
- Date of Birth (Buyer2)
- Buyer2 Gender
- Date of Birth (Buyer3)
- Buyer3 Gender
- To Be Contacted by CRC
- Each deal is assigned a unique **Serial Number (SN)**.

Resale Process

- If the deal is a resale transaction, it is initially assigned a **Property Number (PN)**.
- Once the resale transaction is finalized, the PN is converted into an official **Serial Number (SN)** in the system.

Deal Completion Definition

- A deal is considered “**Completed**” once the agent has fully received their commission.

Commission Payment Process

Commission slabs are a tiered commission structure where the percentage or amount of commission changes depending on performance levels or thresholds. Each company branch has different commission slabs. I will attach the commission slabs for all branches at the end of the document

- The developer releases payment within **45 days**.
- Commission payouts to agents are made **biweekly (15th and 30th of each month)**.
- Commission is calculated based on predefined **commission slabs**.

Commission Structure

- **Junior Agents** → Commission based on assigned slab percentages.

○

SLABS	Commission Amount	Commission to Sales
-------	-------------------	---------------------

	(AED Monthly)	Agent (AED Monthly)
1	0 - 40,000	35%
2	40,001 - 150,000	50%
3	Above 150,000	60%

- **Senior Agents** → Commission based on assigned slab percentages.

SLABS	Commission Amount (AED Monthly)	Commission to Sales Agent (AED Monthly)
1	0 - 40,000	35%
2	40,001 - 150,000	50%
3	Above 150,000	60%

Deal Information

DEAL Fields

SN: Internal serial number used to uniquely identify the deal.

Agent Name: Name of the agent responsible for the transaction.

Project Name: Name of the project or development where the property is located.

Selling / Rent Amount (AED): Total transaction amount in AED.

Commission (AED): Commission earned from the transaction in AED.

Deal Manager: Internal manager responsible for overseeing the deal.

Nationality: Nationality of the client.

Date of Birth: Client's date of birth.

Sales / Rent: Indicates whether the transaction is a sale or a rental agreement.

Unit Number: Identification number of the property unit.

Unit Type: Type of property (e.g., apartment, villa, townhouse).

SOL: Source of lead.

SOL Details: Additional details about the lead source.

Passport Copy: Copy of the client's passport for verification.

Emirates ID Copy: Copy of the client's Emirates ID.

Mobile Numbers: Client's contact phone numbers.

Seller Name: Name of the property owner or party selling the property.

Buyer Name: Name of the client purchasing or renting the property.

No. of Beds: Number of bedrooms in the property unit.

Branch: Company branch responsible for handling the deal (e.g., Abu Dhabi, Dubai, Ras Al Khaimah, West Yas).

Direct / Resale: Indicates whether the property is a direct sale from the developer (primary market) or a resale between private parties (secondary market).

(Each slab corresponds to a percentage range based on deal value.

Property Allocation:

Step 1 – Launch Event Pricing

At the developer launch event, brokers receive a price list or indicative pricing for available units.

Brokers present these prices to potential buyers and identify interested clients.

Step 2 – Client Selects Unit

The broker and client select a specific unit based on the price list shared at the event.

Step 3 – Booking Request Submitted

The broker submits the client's booking request to the developer.

Step 4 – Booking Form Generated

The developer generates the official booking form, which contains the final confirmed price and transaction details.

Step 5 – Price Difference Appears

In some cases, the price on the booking form may be slightly different from the price advertised during the event due to:

- a. updated pricing adjustments
- b. system rounding
- c. unit-specific charges or fees
- d. developer price updates during the launch.

Step 6 – Client Confirmation or Cancellation

The client reviews the booking form. If the price is higher than expected, the client may:
accept the updated price and proceed with the reservation, or
cancel the booking.

Right after a developer's event, a property is sold for an estimated 'price'. However, once the end customer receives the booking form, the price could be slightly different. This can cause the end customer to change his mind, and cancel the booking. The price in the app should reflect the booking form, not the price advertised at the event.

The email is sent to the customer directly? This is critical information for us to allow the broker to upload the invoice for their commissions and then allow us to provide Financing. Is there anyway we can get this through integrations with developer systems?

Yes, in a first-come-first-serve launch scenario, multiple brokers can effectively compete for the same unit. However, the appointments themselves are not tied to a specific unit. Brokers typically book a time slot to attend the launch event or access the developer's inventory system, not an appointment for a particular unit.

During the launch:

Multiple brokers may bring interested clients to the event or sales center.

All brokers can view the available unit inventory.

Units are allocated on a first-come-first-serve basis at the reservation stage, not at the appointment stage.

The unit is secured only when:

1. the reservation form is completed, and
2. the down payment (usually via cheque or payment transfer) is submitted.

the developer blocks the unit in their system, preventing others from reserving the same unit.

Sometimes even someone can get the unit even if they don't have an appointment (unfortunately so). all that matters really is who gets the cheque first.

Unsold Units Process

- If units remain unsold after launch, developers share available inventory in WhatsApp group chats.
- Agents can review and attempt to secure buyers.
- Once a deal is secured, the same documentation and payment of workflow apply.

Records

Currently, how do your records stay in sync with what the broker is doing? Does the broker communicate every step to NationWide to update their records? How does this SOA look like, can you share an example so we can think of automated record matching from this SOA?

Currently it is a manual. We request the statement of accounts and manually match our accounts with theirs. This means that maybe not every step will be communicated efficiently and some might be missed. I'll share some examples of some statement of accounts

This is once the downpayment is received and SPA is signed by client? How is the broker / master broker notified of this event?

DLD registration happens after the SPA is signed and the payment is met. It depends on whether the property is off-plan or ready property.

Off plan: Registration occurs through the **Oqood system** managed by the Dubai Land Department.

ready properties: Buyer and seller attend the DLD trustee office

ownership transfer is completed there.

a Title deed is then issued by the Dubai Land Department

Are there commission clawback scenarios? (e.g., customer defaults, booking cancellation?)

agents notify accounts about this from their interactions with clients/developers. There is not standardized way of what needs to be done in this case.

Reasons for the commission clawbacks:

Pricing: Prices may change between the event announcement and the official booking form, which can cause delays or cancellations.

Miscommunication: Communication gaps between developers, agents, and clients can lead to misunderstandings about availability, pricing, or booking procedures.

Client Decision Changes: Sometimes the client simply changes their mind during the process.

Inventory Status: Developer inventory is not always updated in real time. A unit may already be reserved or sold before the broker attempts to book it.

Commissions: This is rarely an issue, as commission structures are generally standardized across developers.

Nationwide uses quickbook
